A game of collecting and recycling garbage

PLAYER

AGE

TIME

This game take place in a suburban area.

The neighborhood throwing garbage without separating them is an ever growing problem!!

Players take the role as a contractor who is responsible to collect, separate, and move the garbage to designated disposal site to earn rewards, and aims to become the city-designated contractor.

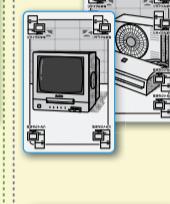

However, one must pay attention to the loading capacity of their garbage truck when collecting garbage.

If you pick up too much garbage and exceeds the loading capacity, you have no choice but to dump them illegally.

Components used in this game

## 88 Garbage Cards

Single (20 each in 4 colors)  
Double (2 each in 4 colors)  
Use all cards

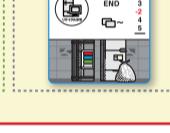

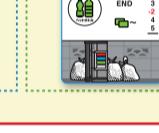

## 28 Reward Cards

7 each in 4 colors  
(0, 1, 2, 3, -2, 4, 5)

## 4 Disposal Plant Tiles

1 each in 4 colors  
Use the RECO PAY+ side facing up

## Setup

## Disposal Plant Tiles and Reward Cards

① Place the 4 disposal plant tiles horizontally in a row in the same direction. The upper side of the disposal plant tile (color of the garbage) forms the recycle area, and the lower side (gray) forms the collection area. Leave some space to place cards in both areas.

② Separate the reward cards by color and stack them face-up in the order of 0, 1, 2, 3, -2, 4, 5, with 0 on the top. Place the reward cards stack on each disposal plant tile with the same color.

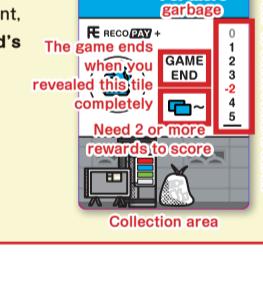

## Garbage Card

③ Shuffle all 88 garbage cards and deal 3 cards facing down to each player as their hand.

④ Put the rest of the cards on the side of the table as a deck.

⑤ Reveal 1 card and place it face up at the collection area on the leftmost disposal plant, and repeat once for all remaining disposal plant from left to right. The revealed card's color does not have to match the color of the disposal plant.

The player who most recently threw some garbage becomes the first player.

Setup is now completed.

Let's see how the game works.

## Overview

## Objective of the game

Dispose the garbage cards in your hand correctly by sending them to the recycle area of the corresponding color. If there are 4 or more pieces of garbage at the recycle area, you will receive a reward (score).

If you failed to handle the garbage cards in your hand carefully enough, penalty awaits during the end of the game.

The winner is the player with the most points when the reward cards of any color runs out.

## Course of the Game

Players take turns in clockwise order starting with the first player.

During their turn, the player must play through step 1-3 as written on the back of this rule sheet.

Check the turn sequence on the back!

## 1. Play garbage card(s) to the recycle area (get reward if applicable)

Choose one disposal plant tile and play any garbage card of the matching color from your hand. Place the card you play to the recycle area above the disposal plant.

You may play as many cards as you wish to the recycle area as long as they share the same color.

After you finish playing your cards, calculate the total number of garbage in that recycle area (1 for single, 2 for double).

1 icon at  
the corner counts  
as Single

2 icons at  
the corner counts  
as Double

### If that recycle area have 4 or more garbage

Take the top most reward card from the top of that disposal plant tile.

Group the reward cards you have earned according to their color and place them in front of you, facing up.

After that, discard all garbage cards in the recycle area of that disposal plant.

\*You only get 1 reward card even there are more than 4 garbage.

### If the recycle area have 3 or less garbage

You do not get any reward card.

Leave all garbage cards in the recycle area.

## 2. Collect the card(s) in the collection area (check for illegal dumping)

After you play any garbage card(s) to the recycle area, you must pick up all garbage cards from the collection area at the bottom of the selected disposal plant tile and add them to your hand.

After adding the collected cards to your hand, count the number of cards in your hand and check for illegal dumping.

### You have 6 or more cards in your hand

You must illegally dump card(s) from your hand until you have 5 cards in your hand.

Keep 5 cards as your hand and discard all other cards face down in front of you.

You may choose which card to keep from your hand.

At the end of the game, each face down card in front of you will cost you a minus 1 point penalty.

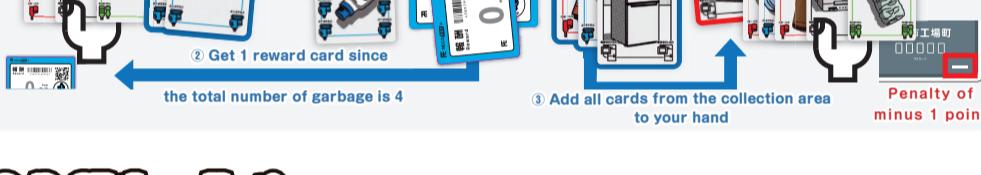

### You have 5 or less cards in your hand

You do not dump any cards from your hand.

#### Example of step 1 and step 2

① Play cards that share a color

④ Illegally dump 1 card in front of you since your hand exceed the limit of 5 cards

## 3. Refill the collection area

After collecting cards from the collection area and check for illegal dumping, refill the empty collection area with new garbage card.

Check the disposal plant tile you chose in step 1. Reveal a number of card(s) equal to one plus the number of garbage in the recycle area from the deck and place them in the collection area.

If the deck runs out, shuffle the discard pile to form a new deck.

After you refill the collection area, you end your turn and the next player begin their turn.

### End of the game

Whenever any player received the last reward card from any disposal plant tile during step 1, continue to proceed until step 3 and the game ends. All players then calculate their score.

## Scoring

### ① Check the number of reward cards

Separate your reward cards by color and check the number of cards of each color.

If any color has only one reward card, discard that reward card without adding it to your score.

### ② Totaling your score

Add up the numbers written on all reward cards.

### ③ Illegal dumping and Excellent company bonus

If there is any garbage card facing down in front of you, subtract 1 point from your total score.

If you have no garbage cards facing down in front of you, you earned yourself an "Excellent company bonus".

You get extra bonus point(s) according to the table below.

No. of excellent company	1 player	2 players	3 players
Bonus score	3 points	2 points	1 points

The player with the highest total score wins. In case of a tie, the player with the least illegal dumping (less face-down garbage cards) is the winner. If it is still a tie, the tied players share the victory.

A game of pushing the blame and garbage

This game take place in a suburban area.

**The garbage collection contractor dispose garbage without separating them is an ever growing problem!!**

Players work in a company who is responsible to separate the garbage, and aims to keep their plant profitable.

However, keep an eye on the garbage separated by your colleagues.

If your colleague does not plan to be the acting supervisor, you will have no idea what they are dumping into the plant.

**Components used in this game**

## 56 Garbage Cards

Single (14 each in 4 colors)

Remove 6 cards from each color

Glass & can (red)

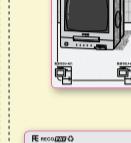

Plastic (blue)

Plastic Bottle (green)

Home Appliance (white)

## 12 Financial Statement Cards

3 each in 4 colors

(Front: 3, 5, 7 points; Back: -3 points)

Return unused items back into the box

Glass & can (red)

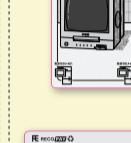

Plastic (blue)

Plastic Bottle (green)

Home Appliance (white)

## 4 Disposal Plant Tiles

1 each in 4 colors

Use the R-ECO side facing up

Glass & can (red)

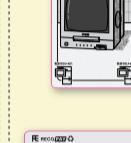

Plastic (blue)

Plastic Bottle (green)

Home Appliance (white)

## 4 Manager Tiles

1 each in 4 colors

Glass & can (red)

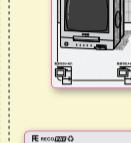

Plastic (blue)

Plastic Bottle (green)

Home Appliance (white)

## 3 Bonus Cards

(Front: +3 points; Back: -3 points)

Return unused items back into the box

Glass & can (red)

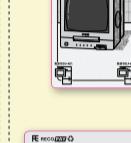

Plastic (blue)

Plastic Bottle (green)

Home Appliance (white)

## 1 Acting Supervisor Tile

R-ECO 環境リーダー

## When playing with 2 or 3 players

Remove a number of garbage cards from the garbage deck according to the table on the right. Return the removed cards to the box.

## Cards to remove

2 players 6 cards from each color (use 8 cards for each color)

3 players 3 cards from each color (use 11 cards for each color)

## Processed area

③ リサイクル責任者

① リサイクル責任者

② リサイクル責任者

④ リサイクル責任者

⑤ リサイクル責任者

⑥ リサイクル責任者

⑦ リサイクル責任者

Place cards facing up to the processed area of its matching color

## Setup

### Disposal Plant Tiles and Financial Statement Cards

① Place the 4 Disposal Plant Tiles horizontally in a row in the same direction. The upper side of the disposal plant tile (color of the garbage) forms the processed area, and the lower side (gray) forms the unprocessed area. Leave some space to place cards in both areas.

② Separate the Financial Statement Cards by color and shuffle them facing down individually. Place the financial statement cards on each disposal plant tiles according to their color facing up, and slide them a little to show all of the numbers on the cards below.

③ Place the Manager Tiles above the Processed Area according to their color.

## Garbage Card

④ Shuffle the Garbage Cards and deal 5 cards facing down to each player as their hand.

⑤ Using the remaining cards, deal 7 cards facing down to each player as their personal deck. Players must place their deck in front of them without checking the contents of their personal deck.

⑥ Reveal 4 cards from the remaining deck and place them face up at the Processed Area according to their color.

⑦ Reveal a card and place it face down at the Unprocessed Area on the leftmost disposal plant, and repeat once for all remaining disposal plant from left to right.

The player who most recently threw some garbage becomes the first player.

## Bonus Cards and Acting Supervisor Tile

Place the Bonus Cards and Acting Supervisor Tile beside the disposal plant tiles.

Check the course of the game on the back!

Setup is now completed. Let's see how the game works.

## Overview

### Objective of the game

Players aim to get rid of their garbage cards in their hand and personal deck to any suitable disposal plant. If you process your garbage correctly, the plant will be profitable, but losing money is easy if someone dumps their garbage card into the wrong disposal plant. After the 3rd round ends, the player with the highest points is the winner of the game.

### Course of the Game

This game consist of 3 rounds, and during each round, players take turns in clockwise order starting with the first player. During your turn, you must play garbage card either facing up or facing down, and refill your hand.

#### Playing 1 card facing up

Choose a disposal plant tile and play one garbage card of the same color facing up from your hand to its processed area.

After playing your card, take the acting supervisor tile from the table or in front of any other players and place it in front of you.

If you already holds the tile, nothing happens.

The player played a garbage card to the white disposal plant. Place the card face up to its processed area. Then, they take the acting supervisor tile and place it in front of them.

#### Refill hand (up to 5 cards)

Draw the number of garbage cards you have played this turn from your personal deck and add them to your hand. If your personal deck runs out, draw as many cards as you can and continue the game with less than 5 cards in your hand on the following turns.

#### End of a Round

When any player's hand and personal deck runs out of card, the round ends immediately. Other players discard all remaining cards in their hand and deck.

After that, players will calculate the score they have earned during this round.

## Scoring

### ① Disposal plants

Reveal the garbage cards placed in all unprocessed area of each disposal plant tile and add them to the cards played in the processed area. Then, calculate the total EP (Ecology Points) for each disposal plant.

**Garbage card with the same color = +1 EP per card**

**Garbage card with a different color = -2 EP per card**

**If the total EP is 0 or more, the treatment plant is profitable.**

The player who has the manager tile for that profitable disposal plant take the topmost financial statement card from the disposal plant and place it in front of them with the black number facing up.

**If the total EP is less than 0 (negative), the treatment plant is losing money.**

The player who has the manager tile for that money losing disposal plant take the topmost financial statement card from the disposal plant and place it in front of them with the red number facing up.

### Overriding previous financial statement

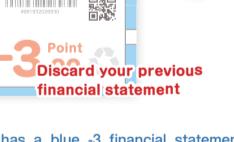

If you took a new financial statement card of the same color as any financial statement card you previously owned, discard the old financial statement card. Which means, you can only have one financial statement card for each color.

### ② Acting supervisor bonus card

At the end of the round, calculate the number of disposal plant which is profitable. If there are 3 or more disposal plant which is profitable, the player with the acting supervisor tile takes a bonus card with +3 facing up. If there are 2 or less disposal plant which is profitable, take the bonus card with the -3 facing up. Each player may have any number of bonus cards.

### [3rd round only] CEO of each disposal plant

During the last scoring round, each player with the manager tile of the corresponding disposal plant takes the disposal plant tile if it is profitable. Each disposal plant tile counts as a +2 points bonus tile.

The player has a blue -3 financial statement card. In the following round, they earned a new blue 3 point financial statement card. They discard the old blue -3 points financial statement card and place the new blue 3 points financial statement card in front of them.

#### Preparing for the next round

If any of the disposal plant's manager tile is unclaimed, discard the topmost financial statement card on the disposal plant tile.

Next, setup the game for the next round but keep all financial statement card in their position.

The player to the left of the player who took the last turn in the previous round is the next first player.

## Final scoring

The game ends after the 3rd round. Each player add up all their scores from their financial statement card, bonus card, and disposal plant tile in front of them. The player with the highest total score is the winner.

In case of a tie, the winner is the player with the fewest number of negative cards from financial statement and bonus. If it is still a tie, the tied players share the victory.
